DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 3-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Lee (6,067,123).

Regarding claim 1, Lee discloses a monitor output device showing a switched input (NTSC signal from IF module 116) or an external input terminal 100, which meets the switched input as claimed, a chroma processor 124 and a format converter 128, which meet the at least one of video improvement circuitry and transcoder circuitry as claimed, and a first switch 120, which meets the switch as claimed.

Regarding claim 3, the switch is externally controlled by a user (col. 2, lines 14-15).

Regarding claim 4, the switch in Lee is inherently remotely controlled because the HDTV monitor inherently includes a remote controller.

Regarding claim 5, see viewing control steps as illustrated in Figure 2.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Lee (6,067,123).

Regarding claim 2, Lee does not specify the internal media player as claimed. In any event, it is understood that the external input terminal 100 could be utilized to receive all kinds of the video signals, both external and internal. The examiner takes Official Notice that using media player in a television receiver is well known in the art. For instance, a DVD player incorporated inside a television receiver enables a compact and portable design. Hence, it would have been obvious to one of ordinary skill in the art at the time of the invention was made to include a media player, such as a DVD player, into Lee to perform the well known functions as claimed.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Bell et al. (4,644,387) shows a switch.

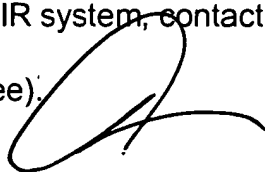

Kim (6,697,122) shows an external input.
